PROJECTS

Court Konnect — MERN Stack SaaS Platform (FYP)

Developed a full-stack indoor sports court booking platform using the MERN stack, designed to streamline court reservations and facility management for users and indoor sports owners across Pakistan. Implemented role-based authentication, real-time slot availability, booking lifecycle management, staff management, notifications, ratings, and multi-dashboard systems for Users, Owners, Staff, and Super Admins. Built scalable RESTful APIs with Express.js and MongoDB, integrated JWT authentication, and designed a modern responsive frontend architecture with React and Tailwind CSS following production-level SaaS practices.
